## Sheet Metal Fabrication & Installation

### Therma Corporation Architectural Sheet Metal Division

Full line of Architectural Sheet Metal fabrication and installation.

## Architectural Sheet Metal

From standing-seam metal roofs and aluminum plate panels to roof metals and flashings, Therma Corporation offers a full line of architectural sheet metal installations and fabrications. Our field installers and managers are professionally trained to build premium products that will endure over time.

Because our prefabrication shop is the most technologically advanced shop in the Bay Area, our fabrication capabilities add quality and value to every project we design and build. Precision weldments, custom canopies, cornices, exotic metal works, stainless steel cabinetry, radius flashings, and panels are just a few examples of what we can expertly produce.

From the top down, our goal at Therma Corporation is to add value and serve customers with our collaboration and deep experience in the architectural sheet metal industry. And we can design with a range of options to fit your budget.
